# Lafeber Product List: Various selections, sizes, and flavors; available for different species of birds

- **Premium Daily Diet Pellets**: Our pellets are nutritionally balanced with natural preserves and flavors; pellets can be a full diet or an important part of your bird's diet. Many owners have found their birds love a combination of foods with their pellets, such as Lafeber's Nutri-Berries and Avi-Cakes, as well as a variety of fresh fruits and vegetables. Available selections for finches, canaries, parakeets, cockatiels, macaw/cockatoo, and other parrots
- **Classic Nutri-Berries**: Nutri-Berries contain seeds and grains. By hulling the seeds and grains and then coating them with stabilized vitamins, chelated minerals and amino acids, Nutri-Berries keeps the nutrition in each and every bite. Unlike regular pellets, Nutri-Berries are designed to provide your parrot with a variety of beak and tongue sensations vital to his behavioral needs. Available for Cockatiels, conures, macaws, parakeets, and other parrots.
- **Gourmet Nutri-Berries**: Each of the four Gourmet Nutri-Berries varieties- Tropical Fruit, Sunny Orchard, Garden Veggie and El Paso —offers the solid nutrition of Classic Nutri-Berries plus the taste and texture of real fruits, vegetables and other flavorful ingredients. Available for Cockatiels, conures, macaws, parakeets, and other parrots.
- **Senior Bird Nutri-Berries**: Like Classic Nutri-Berries, Senior Bird Nutri-Berries could be fed daily as a complete diet for older birds (reaching half of its expected lifespan). Milk thistles are added for its anti-inflammatory and anti-arthritic effect, as well as dandelion to support bone health and improve liver function. We included ginger — a powerful anti- inflammatory herb — to help ease tendonitis, lower cholesterol and blood pressure and to help prevent blood clots. We also combined the joint-health supplements glucosamine to combat osteoarthritis and chondroitin to ease joint pain and swelling. Senior Bird Nutri-Berries are made with 61% pellets, 26% wholesome grains and 13% fruits and herbs.
- **Nutri-Meals**: Nutri-Meals are nutritionally balanced with fruits, vegetables, seeds, and pellets, which are enriched with essential vitamins and minerals. They are handy to pack and feed and small enough to fit in your pocket or purse.
- **Avi-Cakes**: 50% premium seeds with 50% nutritionally balanced pellets, all held together with a great-tasting molasses binder. Its square shape is the perfect "interactive food" for your parrot to hold, pull, twist and crunch to bring out his foraging instincts. Avi-Cake nutrition matches that of most pelleted diets and can be fed as a main meal. It is also an ideal "bridge" food to wean your parrot off of seeds and onto pellets, as many parrots start to eat pellets after eating Avi-Cakes.
- **Pellet-Berries**: Pellet Berries combine all the nutrition and health benefits of pellets with the added excitement of foraging. With Pellet-Berries, your bird enjoys the crunch of pellets, seeds and grains and bites into real pieces of cranberries, apricots and other wholesome ingredients. Your bird will savor the satisfaction of using his beak and tongue to pick apart each berry — a more exciting way of eating than simply crumbling up a regular pellet (81% Pellets + 19% Individual Fruits & Grains). Available for cockatiels, parakeets, and other parrots.
- **Nutri-Start Hand Feeding Formula/ Baby Bird Formula**: Nutri-Start's Baby Bird Formula produces faster weight gains for both domestic and wild baby birds. Nutri-Start mixes instantly with water and is ready to feed once mixed according to instructions. Its main ingredient is premium rice flour for maximum digestibility.
- **Nutrition & Foraging Kits**: contain trial sizes of Pellet-Berries, Avi-Cakes, Tropical Fruit Gourmet Nutri-Berries, Premium Daily Diet Pellets, and Classic Nutri-Berries. Each kit comes in four sizes- parakeet, cockatiel, parrot, and macaw/cockatoo.

Lafeber Prescription Products:

- **Nutri-An Cakes**: Available for small and large birds
  - **Foraging & Weight Maintenance**: This low-energy therapeutic diet may be used for weight reduction and/or foraging. One technique for weight loss is to provide Nutri-An Cakes for Foraging & Weight Maintenance twice daily for 30 minutes. Offer pellets and vegetables for the remainder of the day. Monitor food intake and body weight closely. http://lafeber.com/vet/use-of-nutri-an-cakes-for-weight-reduction-and-maintenance/ for specific, detailed advice.
  - **Recovery & nutritional Support**: A nutrient-dense therapeutic diet designed for the patient that requires high energy and protein. When used as the sole diet, Nutri-An Cakes for Recovery & Nutritional Support should be fed for 9 months or less.
