Formula	For Nutritional Management of	Benefits of Formula
DCO DUAL FIBER CONTROL CANINE FORMULA	<ul style="list-style-type: none"> • Fiber-responsive colitis • Constipation • Large bowel diarrhea • Diabetes mellitus 	<p>Increased fiber and complex carbohydrates and a moderate calorie level to meet the needs of dogs with diabetes or colitis</p>
DH DENTAL HEALTH CANINE FORMULA	<ul style="list-style-type: none"> • Tartar accumulation • Healthy adult dogs, including seniors, for everyday maintenance 	<p>Patented kibble texture Optimal kibble size for everyday feeding Perfect nutrition for adult dogs Added antioxidants and natural source of glucosamine</p>
Also available in DH Dental Health® Small Bites		
DRM DERMATOLOGIC MANAGEMENT CANINE FORMULA	<ul style="list-style-type: none"> • Atopy • Atopic dermatitis • Other inflammatory skin conditions • Pruritus 	<p>Contains high levels of omega-3 fatty acids to help nutritionally manage pruritus Alternate protein sources to help manage food sensitive dogs</p>
EN GASTROENTERIC CANINE FORMULA	<ul style="list-style-type: none"> • Gastritis and enteritis • Vomiting and diarrhea • Pancreatitis • Exocrine pancreatic insufficiency • Inflammatory bowel disease • Lymphangiectasia • Malabsorption, maldigestion • Hyperlipidemia • Hepatic disease not associated with encephalopathy 	<p>Source of medium-chain triglycerides provide a readily digested and utilized energy source Diet is highly digestible, low in fiber, moderate in fat</p>
Also available in EN Gastroenteric Naturals™ With Added Vitamins & Minerals and in a canned formulation		
HA HYDROLYZED CANINE FORMULA VEGETARIAN FORMULA	<ul style="list-style-type: none"> • Elimination diet for food trials • Food allergy dermatitis • Food allergy gastroenteritis • Exocrine pancreatic insufficiency • Inflammatory bowel disease • Lymphangiectasia • Malabsorption • Hyperlipidemia • Protein-losing enteropathy • Food intolerance • Chronic non-specific diarrhea or vomiting • Pancreatitis • Hepatic encephalopathy 	<p>Contains only hydrolyzed protein sources that are modified to a lower molecular weight that is less likely to induce an allergic response</p>
Also available in HA Hydrolyzed® Chicken Flavor Formula		
JM JOINT MOBILITY CANINE FORMULA	<ul style="list-style-type: none"> • Osteoarthritis • Other inflammatory joint conditions • Rheumatoid arthritis • Heart disease 	<p>Nutrition formulated to help improve mobility in arthritic dogs Reduces enzymes involved in cartilage breakdown Unique blend of long-chain omega-3 fatty acids, a natural source of glucosamine and antioxidants</p>
NF KIDNEY FUNCTION CANINE FORMULA	<ul style="list-style-type: none"> • Renal failure • Conditions that may benefit from moderate sodium restriction • Hypertension • Hepatic disease associated with encephalopathy 	<p>Reduced protein and sodium, low phosphorus Source of omega-3 and omega-6 fatty acids Maintains an alkaline urine pH</p>
Also available in a canned formulation		
OM OVERWEIGHT MANAGEMENT CANINE FORMULA	<ul style="list-style-type: none"> • Obesity • Hyperlipidemia in overweight dogs • Diabetes mellitus in overweight dogs • Fiber-responsive colitis • Constipation 	<p>Low fat, increased fiber and a high protein to calorie ratio Contains a source of isoflavones (dry)</p>
Also available in Select Blend Overweight Management™ formula and in a canned formulation		
UR URINARY[®] Ox/St[™] CANINE FORMULA	<ul style="list-style-type: none"> • Dissolution of sterile struvite uroliths • Reducing the risk of calcium oxalate urolith recurrence • Reducing the risk of sterile struvite urolith recurrence 	<p>Promotes the production of urine undersaturated for sterile struvite Promotes the production of urine metastable for calcium oxalate Moderate calorie content</p>
FortiFlora[®] Canine Probiotic Supplement	<ul style="list-style-type: none"> • Diarrhea associated with microflora imbalance • Acute enteritis • Diarrhea associated with stress, antibiotic therapy and diet change • Poor fecal quality in puppies • To promote a strong immune system 	<p>Proven to promote normal intestinal microflora Helps to restore normal intestinal health and balance For the dietary management of dogs with diarrhea</p>

Feline Reference Guide

Formula	For Nutritional Management of	Benefits of Formula
	<ul style="list-style-type: none"> • Plaque and tartar accumulation • Healthy adult cats, including seniors, for everyday maintenance 	<p>Patented kibble texture Optimal kibble size for everyday feeding Perfect nutrition for adult cats Added antioxidants and natural source of glucosamine</p>
 <p>Also available in a variety of wet texture and flavor options</p>	<ul style="list-style-type: none"> • Diabetes mellitus • Persistent hyperglycemia • Enteritis • Diarrhea • Hepatic lipidosis • Critical care 	<p>High-protein, low-carbohydrate diet Helps normalize blood glucose levels May reduce insulin requirements</p>
 <p>Also available in EN Gastroenteric Naturals™ With Added Vitamins & Minerals and in a canned formulation</p>	<ul style="list-style-type: none"> • Enteritis • Gastritis • Diarrhea • Vomiting • Hepatic lipidosis • Pancreatitis 	<p>High-protein, low-carbohydrate diet to meet the unique nutritional needs of cats Provides optimal nutrition for cats with compromised gastrointestinal tracts</p>
	<ul style="list-style-type: none"> • Elimination diet for food trials • Gastroenteritis associated with food allergy • Food intolerance • Dermatitis associated with food allergy • Chronic non-specific diarrhea and vomiting • Inflammatory bowel disease • Pancreatitis 	<p>Hydrolyzed protein and a low allergen carbohydrate source to help reduce the risk of a food allergic reaction</p>
 <p>Also available in a canned formulation</p>	<ul style="list-style-type: none"> • Renal failure • Conditions that may benefit from moderate sodium restriction • Hypertension • Hepatic disease associated with encephalopathy 	<p>Reduced protein and sodium, low phosphorous Maintains an alkaline urine pH</p>
 <p>Also available in a variety of wet texture and flavor options</p>	<ul style="list-style-type: none"> • Obesity • Diabetes mellitus in overweight cats • Hyperlipidemia in overweight cats • Constipation • Fiber-responsive colitis • Hairballs 	<p>Low fat, increased fiber and high protein to calorie ratio to help support safe and effective weight loss or help maintain a healthy weight</p>
 <p>Also available in a variety of wet texture and flavor options</p>	<ul style="list-style-type: none"> • Feline lower urinary tract disease • Struvite stones and crystals • History of calcium oxalate • Idiopathic cystitis 	<p>Reduces the risk of both struvite and calcium oxalate stone formation Helps promote increased urine volume (dry)</p>
	<ul style="list-style-type: none"> • Diarrhea associated with microflora imbalance • Acute enteritis • Diarrhea associated with stress, antibiotic therapy and diet change • Poor fecal quality in kittens • To promote a strong immune system 	<p>Proven to promote normal intestinal microflora Helps to restore normal intestinal health and balance For the dietary management of cats with diarrhea</p>

These diets help minimize the risk of both struvite and calcium oxalate crystal formation, while managing the primary condition.
